|--|-------------|
| | Marks
15 |
|--|-------------|
- Q1. (a) MCQs. Select the *Best Suitable* answer for each.
- i. Characteristics of an entity or organism to alter itself of its responses to the changed circumstances or environment
 - 1. Programmer/Analyst
 - 2. Adaptability
 - 3. Feedback
 - 4. Database Administrator
 - ii. The total volume of work performed by the computer system over a given period of time is termed as
 - 1. Throughput
 - 2. GHz
 - 3. MHz
 - 4. Output
 - iii. A group of circuits interconnecting all sections of the microprocessor is called a ____
 - 1. Protocol
 - 2. Control Unit
 - 3. Bus
 - 4. ALU
 - iv. _____ is a boundary shared by human beings and computer.
 - 1. Reports
 - 2. Interface
 - 3. Data
 - 4. Printer
 - v. _____ means browsing for information over the internet.
 - 1. Search Engine
 - 2. Internet Explorer
 - 3. Surfing
 - 4. Searching
 - vi. Information of a permanent nature is stored in a _____ file.
 - 1. Backup
 - 2. Flat
 - 3. Transaction
 - 4. Master
 - vii. A network topology where all computers are connected to a central Hub is called _____.
 - 1. Token Ring
 - 2. Star
 - 3. Ring
 - 4. Bus

- viii 'Firmware' is associated with:
1. Application Software for firm
 2. Special purpose hardware
 3. Software in ROM
 4. Benchmark Software
- ix Transistor Technology was used in _____ generation of Computers.
1. First
 2. Second
 3. Third
 4. Forth
- x A number system with a base of 8 is known as :
1. Binary
 2. Octal
 3. Hexadecimal
 4. Digital
- xi Point-of-Sale or POS pertains to:
1. Sales point plotted in computer graphics
 2. Sales between two locations
 3. A value that indentifies the location of sales data
 4. An input-output device updating sales and inventory
- xii Process in which the effect or output of an action is returned to modify the next action.
1. Feedback
 2. Product
 3. Reply
 4. Feed Forward
- xiii State the major point(s) the Requirement Analysis phase covers:
1. Interviewing staff at different levels
 2. Examine current business and system documents and output
 3. Observation of the current procedures
 4. All of the above
- xiv Windows XP is an example of _____ system.
1. Open
 2. Hardware
 3. Close
 4. Compiler
- xv _____ is a computer to computer communication using a standard data format to exchange business information electronically between independent organizations.
1. Program
 2. EDI
 3. Wi-Fi
 4. WAN

Q1. (b) Match the definitions of terms given in column I with the description in column II.

15

	Column - I		Column – II
1	PIXELS	A	Communication between two pieces of hardware.
2	PEER-TO-PEER	B	Picture elements in individual dots.
3	HANDSHAKING	C	Scrambling of data
4	HANG-UP	D	Light-emitting diode
5	SPOOLING	E	Buffer storage to reduce processing delays.
6	DML	F	Hyper Text Transfer Protocol
7	ENCRYPTION	G	Output device
8	LED	H	Collection of computers with the same access rights as every other computer on the network.
9	IP	I	Problem in hardware, control software or media.
10	HTTP	J	Relating to measurement of network speed.
11	LCD	K	Logical Error
12	BANDWIDTH	L	Shows the flow of data
13	BUG	M	High speed buffer memory
14	DFD	N	Retrieve or access the data from database
15	CACHE	O	Set of standards or rules (Communication).

Q2. (a) Explain the term “*System Development Life Cycle (SDLC)*”.

6

(b) Explain the following models of SDLC;

4

i. Waterfall Model

ii. Rapid Prototyping Model

Q3. Briefly define the following systems;

a. Transaction Processing System (TPS)

4

b. Decision Support System (DDS)

4

c. Executive Support System (ESS)

4

d. Expert System (ES)

4

Q 4. (a) Differentiate between the followings terminologies;

15

i. Centralized and Distributed Processing

ii. Batch and Online Processing

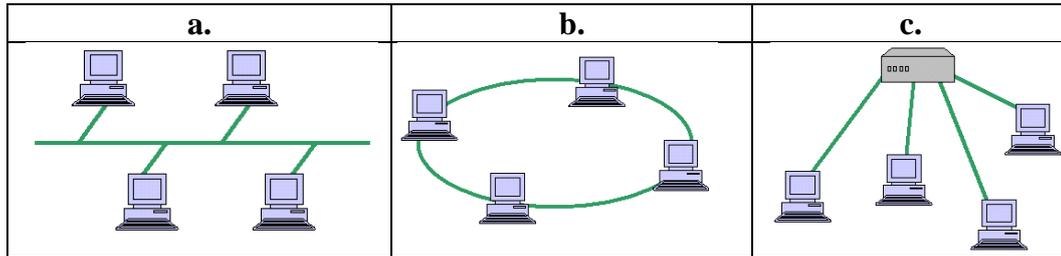

iii. Direct and Parallel Change Over Methods

(b) What do you understand by “*E-commerce*”? And write down its four advantages.

4

Q 5. Name the following topologies:

3

- Q6. (a) What is *information*? Define two methods of accessing the information. 3
- (b) How, the security of data and computer operations can be improved of a computer based Financial System? Give your answer in points. 3
- (c) How does System Analyst collect information for IS department? 3
- Q7. (a) What is a database? 4
- (b) Define the functions of DBMS. 3
- Q8. (a) “*Is it better to purchase the ERP software packages from market than to develop such packages in-house?*” Evaluated the statements and give your arguments 3
- (b) Explain the steps involved in IS Audit of a Computer Based System (CBS), (Accounting System). 3
